Subject: Aircraft Hangar Space Demand Survey

1. The Lake Havasu City Municipal Airport is preparing for the development of additional hangar space. As part of the process, we are surveying our Airport service area and tenant community to revalidate hangar demand. We will use this information to update an earlier preliminary project site design and inform economic projections and feasibility.

2. Along with the survey results, we will revalidate our hangar wait lists and will establish a new wait list application process including an appropriate deposit. Further information on this process will be forthcoming.

3. Please complete the survey and return it to Airport Operations, in person, via mail or email at [airport@lhcaz.gov](mailto:airport@lhcaz.gov) or [HerzogC@lhcaz.gov](mailto:HerzogC@lhcaz.gov) by 14 March 2025.
