

SEWER

Your monthly sewer charge is calculated based on one of the following:

- Your actual water consumption
- Your winter average

Either calculation must remain in place for one year, from May through April.

If you have an irrigation meter, your sewer charge will be calculated based on actual water consumption. From the domestic meter.

The winter quarter average usage period begins in November and ends in April. The city is divided into four cycles; your start date will vary depending on your location.

In order to achieve the minimum sewer rate of **\$41.00** your average monthly water consumption must be **562** cubic feet or less. Your consumption can be found on the water meter information section of your monthly billing statement.

Your sewer charge consists of a base amount of **\$41.00 + \$7.30** for every 100 cubic feet of water consumed exceeding 562 cubic feet.

Sewer fee to cover fixed costs during months without activity.....**\$30.75**

WATER

Every applicant shall be liable for services furnished until the city receives written or verbal notice to cancel and shut off the water.

Applicants for water service may be required to pay a deposit fee based upon the type of service requested. The deposit will be held for one year. If the customer has a satisfactory payment record, the deposit will be applied as a payment to their account. Deposits will not be applied to delinquent accounts unless service is cancelled.

Meters are read monthly and billings are mailed monthly. You will be charged for all water received through your meter during the period between two meter reading dates plus a monthly meter charge. These charges are due and payable immediately. If charges are not paid by the 20th day after the date of billing, they are delinquent and a penalty of 10% of the total bill shall be added. For each successive 20-day period that the bill remains unpaid, an additional 10% of the amount of the total bill shall be added.

Failure to receive bills or notices shall not prevent such bills from becoming delinquent, nor relieve the customer of his obligations. When a bill becomes delinquent by 5 days, which shall be 25 days after billing, the city will notify the user of the delinquency which will result in discontinuance of service if not paid within 10 days. The city may, without any further notice, discontinue service until all outstanding charges are paid in full, including a charge for restoration of service.

A water user having a delinquent account on one premise may not receive water services on a new or other account on another premise until delinquent account has been paid, including penalties, if any.

Establishment Fee.....\$35.00
Same Day Service/Reconnect fee.....\$70.00
Deposit without Sewer.....\$50.00
Deposit with Sewer.....\$100.00

TRASH

Every residence is charged monthly by the city for trash service. This is a mandatory charge that can only be terminated upon the termination of all water service to the premises. Trash service is provided by Republic Services. Contact Republic services or visit our website to know your trash schedule. Republic Services (928) 855-9441.

Monthly trash service.....\$17.51
